OUR NEW YORK LETTER

Gossip About the Young Men Whose Prospects Are Bright

Tarkington, Author of -The Gentleman From Dellana," and Hackmann, Whose invention May Revointinuize Battenad Operations.

New Young June 82-(Special J-They theny Haps Harchine for The Price of Zenda. Turking out a freedy belo fairty complicable to Hope's as a story

The Jewet in the Chaff.

There is not a periodical publisher New York probathe innis every week to ful the puzes of his periodicule for a year or more. Were the quality of these manuscripts up to the standards the labor of editing the to a good demand for chasse and receipts were kept. This week has developed better than usual at this time of year, but there is no activity.

Dealers are all out of pickled herring and prices are sommat. The prospects for the best, small sizes, and receipts are all out of pickled herring and prices are sommat. The prospects for the best, small sizes, and prices are normal. The prospects for the summer catch are reported to be good, and new supplies will procably be along early in fully.

Smokel certing are quiet, with no change aprices. Supplies ample. Sales at it to it cents, and most reaching the cents, and most reaching the cents, and some supplies ample. Sales at it to it cents, and some approach of the summer certification of the short of the difference of the problems of companies to to learn wondling town about that used composition. Tarkington was a great favorite at Princeton. He was blendied with the give cité for tonian

A Different Type.

Investor Hardmann, who recently sold partial rights for the use of his patential continuous rail, so called, to a New York studiante, spends nearly half his time here, though his home is in Mil-Wankee. Hackmann is of German blood, as his

name would indicate. He came to America when only a boy and cannot be far from 10 new. In 1803 he was for-man of one of the mechanical exhibits at the Chicago World's fair at possibly \$100 a month. Today his income is 20 or 30 times as much. With his parents America, but now he travels as first class as he can wherever he gas, never getting using with less than a "drawing room" to himself on his journeys lesup German washingman to perfection whenever he goes travelling. He take with a slight accent, as suggestive of the Scambinstan as the German. He has taken by bindreds of persuas for all One observer of his work my he may by half by not blacks as his a floore is Tools, the art the newspapers may not give him as much attention as these two and operation will imberge a radical

road property curfitted the instant unther engine or rat approaches or is approached to within a certain distance— say one mile—on the same track.

Block Systems to the Rear. The principle of the Hackmann indiordinary push button electric call bell is worked. Each engine contains two batteries, wires from which are in con-tact with both rails, one battery serving for approaches from in front and the other from behind. So long as the track s clear there will be no flow of current and no circuit, but as soon as either engine or car comes within the prescribed distance, regulated by the amount of electrical "resistance" pro rided in the apparatus, the circuit is completed, the current will flow freely, and a bell connected with the front or rear circuit, as the case may be, will be rung in the engine cab. In this way the engineman will be warned far more offectively than he could be by any signals.

Compared with the block signals the warning bell would be almost infinitely more certain to attract attention, for the sound of the bell would assail the sar instead of the eye, and the engineman would not have to be specially watchful to observe it. A violently ringing beil indeed would almost certainly awaken an engineer when asleep, whereas such a one would surely miss block signals. Practical railroad men who have been

acquainted with the principle of the Hachmann train indicator look for highly important results from its testing, soon to occur on the Great Northern, though they point out many difficulties that must he overcome before it can be adopted. It can never be of value in railroad yards, they say, since there engines and trains are supposed to approach sometimes almost to contact, but "on the fine" it may prove so valuable as to compel general adoption.

to the coffee drinker. Coffee drinking is a hate

givil to them. Tam sure I couldn't turn my back on them after an introduction and say over my shoulder. Go away. do, or you'll fall in love with me Then they get to be attentive either by degrees or all at once. Would you have me refuse to dance twice with the same man-I never do more than that-or she drew away with a gasp "Oh. send back his candy or his flowers !"

"You need not go to extremes, but there is a medium that might be happier for all concerned. You might ab stain from languishing, trusting smiles

"I don't languish and I certainly don't trust them or anybody else. It's not my fault that I have habyish eyes and a pretty mouth. I am sure I wish they were as cold as steel and as hard as an old cat's. I'd be a great deal happier." Tears arose in the blue depths. He was only her brother-in-law, but he was likewise a man, and he had to make a desperate struggle not to appear melted at once. She went on "When ing blue eyes looked up into his face. I begin to think they are getting too serious. I try to repulse them. I am as not cold as ice and awfully civil. Then -I get to thinking they must think me a goose and a prig to retreat before they advance. So then I am nice to them again, and then-then the crash comes. I suppose it's wrong, but I am perfectly innocent of any intention, and it makes me feel very sorry for them. Do you suppose I like it?"

'I don't suppose anything about it. Only just mind this"-he nerved himself to extreme severity—"Philips is my friend. He is a splendid fellow. He has had a pretty hard and sad life, and I will not have you adding one drop to his cup of woe. Do you understand ! If you let him fall in love with you and refuse him, you shall go straight home. and your sister and I will be very angry

He arose and held out his hand to help her to her feet. She stood up and shook the sand from innumerable ruffles and frills.

Distressing kidney and bladder diseases lieved in six hours by the "New Great South American Kitney Cure" This new remedy is a great surprise on account of its exceeding promptthat "We must make useless by our behavior the presence of a strange Power in the island, and must assist the Americans to complete the honorable mission they have been compelled to assume by force of circumstances."

ly certain of it.

"No. I wouldn't, but I d have you encourage them considerably less."

"Encourage them I never do. It is simply this way." She turned and faced one of the most beautiful spots on

charms of the place. Philips answered shortly and began again. "I asked you to come out here with me because I had something" — "Is that some one over there under the date palms, the one near the steps, or is it just a shadow? It is odd bow shadows take on human shapes at times. don't you think?" and more in like vein until another tour of the court was

accomplished. Philips renewed the at tack. Miss Garrick interrupted. "I think it is chilly out here, don't you! Wouldn't it be wise to go in?" 'No." said Philips. "it would not Draw your cape closer, and you will be warm. It is an exceptionally mild night. I have something to say before

you go in." YHave you! But tell me first how you liked the book I leaned you. Truly she was making a brave fight to keep her promise, but the strain was wearing upon her. She insisted upon going inflores. "I am almost frozen. Just feel my hands.

"Certainly," said Philips. Miss Garrick clasped them behind laking her. "I don't mean that. You can take my word for it, I suppose." "Of course, but that was not what

Fancy quoting what a girl did or didn't say, and me especially. I am the most shallow and unreliable of mortals. You can't trust me at all." She felt it was very hereic of her thus to malign

"Really? But are you going to stop talking and let me say what I brought

She reflected that he was very serious, almost tragic-that he would be unmanageable. He reflected that what he had heard of her was true. She expected men to fall at her feet and sue When this was finally borne in upon him, he took refuge in the perversity of his sex. He would not fall at her feet neither would be sue. He had meant to do both, but on the instant be changed his plans. He could wait, and in the meantime he would teach her a less in. He thought it was needed. He drew her arm through his, and she walked weakly to her doom. She saw here if sent home in disgrace, an anury brother-in-law, a weeping sister and yet another broken hearted lover throwing ourses after her, and she was now

"I wanted to tell you," said Philips. To such a pitch was she wrought that

den to she cried. "Don't what? Have you any objection to my telling you that I caught 77

Miss Garrick stood still and drew her band across her brow. She was dazed. "I thought" - she began. "Ch, you thought," said Philips,

"that I was going to be the same kind

of a fool as all the others and tell you that I loved you after a fortnight's acquaintance: "Don't you!" she asked. She was re-

gaining consciousness slowly.
"Yes, but I can wait." The appeal-"Don't wait!" she said, and he did

A Little Difference.

Here is a good story of a passage at arms between a well known English woman and the late Sergeant Parry "You are Mrs. Georgiana Weldon!" asked the distinguished lawyer.

"No. I am not." "You don't understand me. I asked you, are you Mrs. Georgiana Weldon?" "I know you did, and I say I am

"But you are the wife of Mr. Wei-

"Yes, I am." "Then surely you are Mrs. Weldon!" "Of course I am."

"And is not your name Georgiana?" "Certainly not." "What is it, then ?" "Georgina."

"Then why could you not say so at

"Because you didn't ask me."
